

5 Things You Need To Know About The Delta Variant

- 1) Delta is more contagious than the other virus strains.
- 2) Unvaccinated people are at HIGH risk.
- 3) Delta could lead to "hyperlocal outbreaks."
- 4) There is still more to learn about Delta.
- 5) Vaccination is the best protection against Delta.

It is important that we all stay vigilant. It is easy to relax the use of masks, hand-washing and other precautions, but with the Delta Variant, a new outbreak could still happen. Our continued vigilance is essential at this time. As indicated, Vaccination is the best protection! So if you are still on the fence, now is the time to reconsider.

There are many locations available to get vaccinated. If you still need help contact us.

NY Residential - Tranet Hymon
 THymon@cfsny.org

NY Community & SDS - Linda Schellenberg
 lschellenberg@cfsny.org

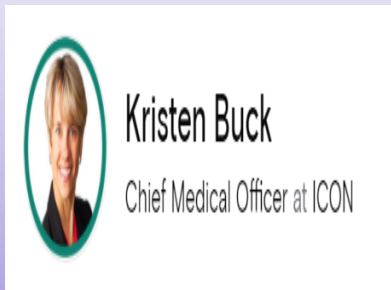

NJ - Donna Messina dmessina@cfsny.org

Why did you get vaccinated?

Kristen Buck
 Chief Medical Officer at ICON

Dr. Kristen Buck joined us for a Town Hall meeting on 6/30 and shared answers to questions that some of you had posed. Dr. Buck is an internal medical physician, Chief Medical Officer at ICON, a former FDA Medical Director and a former Global Safety Officer. If you missed it, please click the link to watch the recording. <https://www.youtube.com/watch?v=5GxqXq8oyTU>

WINNER OF THE \$100 GIFT CARD

Laura Gockley, DSP NJ

Congratulations
